— CONSULTING —

PEOPLE ■ STRATEGY ■ RESULTS

PHILOSOPHY & APPROACH · CLIENT GUIDE

From vision to a workable plan.

The people, decisions, and practical work behind your
next stage.

Business & private practice growth
AI product development · Nonprofit expansion
Running · College fit · Recruiting strategy

WORKING DRAFT FOR MICHAEL'S REVIEW

Proposed philosophy and offer language—not a finished client handout.

01 / THE PROPOSED PHILOSOPHY

People. Strategy. Results.

A good plan connects the outcome you want with the people and systems needed to make it possible.

Start with people.

Understand who the work is for, what they need, and what the team can realistically sustain. Growth should strengthen the experience of the people you serve—not simply create more activity.

Make the strategy usable.

Turn a broad ambition into clear choices: what matters first, what is outside scope, who owns each step, and what needs to be true before you move forward. Technology should serve that plan.

Define useful progress.

Agree on the deliverable and how you will judge it. A result may be a launch decision, a workflow people can use, a build-ready product plan, or a pilot your board can evaluate. Revenue, funding, athletic performance, and admissions outcomes cannot be promised.

The working principle

See the whole system. Choose the next useful step. Build the capacity to keep moving.

For Michael: these are proposed principles drawn from the direction you described. Your workbook answers should supply your own language, examples, and any corrections.

02 / MEET MICHAEL V. MENDEZ

The person behind the approach.

Creator & orchestrator of Plot Twist HQ.

Michael conceived and orchestrated the platform, connecting its business vision, product direction, operating workflows, and AI-assisted development.

That work informs his approach to consulting: understand how the parts connect, make the decisions, and coordinate the path from idea to execution.

Seven years leading collegiate athletes.

Michael was a Division II head coach for men's and women's cross country and track & field. His reported coaching record includes:

30+

All-Americans

140

All-Conference athletes

9

Conference Athletes of the Year

He brings a coach's perspective to development, program building, running, student-athlete college decisions, and recruiting strategy.

Personal expertise. Connected support.

You work directly with Michael. His consulting and coaching practice is managed by Plot Twist Co.; Plot Twist HQ supports client coordination and payment workflows. Software access and ongoing management are separate scopes.

Before publication: confirm institution, dates, and whether award totals count athletes or selections. Business case studies and measured business outcomes will be added only from approved examples and supporting evidence.

03 / THE CLIENT EXPERIENCE

Clarity first. Then the work.

1. Connect.

A free 20-minute fit conversation helps us understand your goal, the constraints, and whether this is the right kind of support.

2. Define.

A written proposal confirms the scope, deliverables, responsibilities, schedule, and payment terms. You know what is included before you purchase.

3. Work through the decisions.

We review the agreed inputs, use working sessions to resolve questions, and develop the deliverables. Timely feedback and access to the agreed information keep the work moving.

4. Leave with something usable.

Your written work becomes a brief, blueprint, roadmap, or playbook. It records the decisions and next steps so you can use it after the engagement ends.

A guide is not the whole engagement.

The public introduction explains the approach. Your package document is tailored through the work you purchase. It is not a generic white paper or an instant-download course. File formats and editable tools are confirmed in the proposal.

Implementation, ongoing advisory, and managed operations can be quoted separately. No inquiry starts a subscription or authorizes a charge.

04 / PRIVATE PRACTICE

A stronger practice. A clearer next stage.

Practice Launch Sprint

\$2,500 starting

4 weeks · 4 working sessions · USD

Connect your offer, client experience, and operations into a realistic launch plan.

- Service positioning and pricing worksheet
- Inquiry-to-payment client journey
- Technology and workflow recommendations
- A prioritized launch checklist and handoff

Your Practice Launch Playbook

Your positioning, client journey, technology decisions, and prioritized launch checklist.

One practice and one primary service model. Filing, credentialing, legal review, and software subscriptions are separate.

Practice Scaling Sprint

\$5,000 starting

8 weeks · 6 working sessions · USD

Grow beyond a full caseload with an operating model that supports your team and the people you serve.

- Practice capacity, referral, and client-flow assessment
- Solo-to-group or team-expansion model and role map
- One priority intake, scheduling, or billing workflow redesign
- 90-day growth plan with hiring assumptions and measures

Your Practice Scaling Roadmap

Your capacity assessment, role map, priority workflow, and 90-day growth plan.

One practice and one growth scenario. Recruiting, payer credentialing, legal review, new-location setup, and implementation are separate.

05 / TECHNOLOGY & BUSINESS GROWTH

Build around the real problem.

AI Product Blueprint

\$5,000 starting

6 weeks · 6 working sessions · USD

Define a useful first version before investing in custom development.

- User and workflow discovery
- Product requirements and key screen flows
- Architecture, data, and AI review plan
- Build phases, priorities, and an implementation estimate

Your AI Product Blueprint

Your requirements, screen flows, architecture considerations, and phased build estimate.

One product concept. A production application is a separately scoped build.

Growth Systems Sprint

\$5,000 starting

8 weeks · 6 working sessions · USD

Find the operational constraints and design a model your team can repeat.

- Capacity and bottleneck assessment
- Roles, handoffs, and priority workflow map
- One expansion or partnership opportunity plan
- 90-day execution plan with owners and measures

Your Growth Systems Playbook

Your bottleneck assessment, operating model, expansion opportunity, and 90-day execution plan.

One business unit and one growth priority. Hiring, rollout, and ongoing management are scoped separately.

More reach. A responsible plan.

A successful local program may have room to reach people through partnerships, community delivery, a training model, or a digital extension.

Impact Expansion Lab

\$7,500 starting

90 days · 6 leadership working sessions · USD

Translate a strong local program into a responsible expansion plan.

- Readiness assessment and up to 3 stakeholder interviews
- Repeatable program and delivery model
- Partnership map and pilot budget assumptions
- Board-ready roadmap, measures, and pilot recommendation

Your Impact Expansion Roadmap

Your readiness findings, program model, partnerships, pilot assumptions, and board-ready recommendation.

One program and one expansion scenario. Grant writing, fundraising, travel, and pilot delivery are separate.

A pilot before a promise.

The roadmap compares the opportunity with delivery costs, staff capacity, and mission. It gives leadership a recommendation it can evaluate—including reasons to proceed, adapt, or wait.

A proposal can account for board review, procurement requirements, or a smaller first phase. Expansion is a decision to evaluate, not an outcome to assume.

07 / RUNNING & COLLEGIATE ATHLETICS

Different goals. Clear starting points.

For runners.

Running Reset Session: **\$125** for one 60-minute conversation and a written two-week starter outline. Find Your Stride: **from \$450** for eight weeks, three calls, weekly written reviews, and a personal plan.

For student-athletes & families.

Direction Session: **\$175** for a 60-minute family conversation, fit worksheet, and next steps. College Fit Roadmap: **from \$900** for six weeks, four sessions, up to eight schools researched, outreach preparation, and a decision framework.

For collegiate coaches.

Recruiting Strategy Sprint: **from \$1,500** for four weeks and three working sessions. Your playbook organizes prospect criteria, a talent-source map, evaluation and follow-up workflows, and a 90-day recruiting plan.

The five-year coaching library

A separate branded coaching playbook is in development, pending Michael's lesson files, editorial choices, and permissions. It is not currently promised as an included or completed resource.

Prices are USD. Running coaching is educational support, not medical care. For minors, a parent or guardian coordinates enrollment, consent, and payment. College guidance does not promise admission, aid, eligibility, or a roster place. Institutional recruiting remains subject to the institution's approval and compliance process. Private family information is not sold or shared as a prospect list.

Full package inclusions and exclusions appear at plottwisthq.com/michael/packages and in your written proposal.

08 / WHAT COMES NEXT

Bring the question. We'll define the work.

One decision? Start with a Clarity Session.

\$250 USD · One 60-minute session. A pre-session questionnaire, focused working conversation, and written decision summary with next steps. Implementation is separate.

You keep: Your Decision Brief.

Before our first conversation

- What are you trying to make possible?
- What is happening today, and where is the work getting stuck?
- Who needs to be involved in the decision?
- What capacity, timing, or budget constraints matter?
- What would a useful next step look like?

Do not send patient records, private student information, account passwords, or payment credentials with an inquiry. If sensitive information is necessary for an agreed engagement, an appropriate sharing method is arranged separately.
